

KUNAL DESHMUKH

DevOps Engineer

+91 9172634412 | kunaldeshmukh336@gmail.com | LinkedIn | GitHub | Pune, India

PROFESSIONAL SUMMARY

DevOps Engineer with 3+ years of experience in CI/CD automation, containerization, and cloud-native infrastructure across Azure, AWS, and on-premise environments. Skilled in Kubernetes (AKS) and Docker Swarm orchestration, Infrastructure as Code practices, monitoring and observability (Prometheus, Grafana, Loki), and secure network configuration. Proven track record delivering end-to-end DevOps lifecycles — from CI/CD pipeline design through production deployment, HTTPS/reverse proxy setup, and code-quality gating — for containerized microservices and .NET applications.

CORE COMPETENCIES

CI/CD & Automation: Jenkins, GitLab CI, GitHub Actions-ready workflows, SonarQube, Bash/Python scripting

Infrastructure as Code: Terraform (on-premise server provisioning)

Containers & Orchestration: Docker, Docker Swarm, Kubernetes (AKS), Helm-ready deployments, Azure Container Registry

Cloud Platforms: Microsoft Azure, AWS, Utho Cloud, On-Premise

Monitoring & Observability: Prometheus, Grafana, Loki, Portainer.io, centralized alerting

Networking & Security: NGINX reverse proxy, Azure Application Gateway, pfSense Firewall, HTTPS/SSL, IP addressing & subnetting, access control

OS & Infrastructure: Linux (Ubuntu, CentOS), Windows Server 2022, Proxmox, IIS

PROFESSIONAL EXPERIENCE

DevOps Engineer | Pitaysys Software Pvt. Ltd.

Apr 2026 – Present

- Manage end-to-end CI/CD pipelines in Jenkins and GitLab, automating build, test, and deployment workflows for production .NET applications and reducing manual release effort.
- Orchestrate containerized microservices with Docker Swarm, maintaining high availability across 6 production nodes.
- Own image lifecycle and versioning for containerized workloads in Azure Container Registry, including tagging strategy and cleanup policies.
- Configure and maintain Azure Application Gateway for secure traffic routing, SSL termination, and load balancing of production .NET workloads.
- Deploy and maintain infrastructure supporting a production .NET application, monitoring uptime and coordinating release rollouts with minimal downtime.

DevOps Engineer | Honchominds Pvt. Ltd.

Nov 2024 – Apr 2026

- Built and maintained Jenkins-based CI/CD pipelines integrated with GitHub, automating build, test, and deployment cycles across multiple projects.
- Containerized applications with Docker and managed image versioning and storage in Azure Container Registry.
- Deployed and operated microservices on Azure Kubernetes Service (AKS), managing scaling, service exposure, and rolling updates.
- Implemented centralized monitoring and alerting with Prometheus and Grafana, improving visibility into application and infrastructure health across 10 production nodes.
- Provisioned and managed on-premise server infrastructure using Terraform, codifying infrastructure setup for consistent, repeatable deployments.
- Agentis AI ChatBot — End-to-End DevOps Deployment: Designed the full CI/CD lifecycle (Jenkins + GitHub), containerized backend/frontend with Docker, deployed to Kubernetes, implemented HTTPS via NGINX reverse proxy, and integrated SonarQube for automated code-quality gating.
- NyayGPT ChatBot — End-to-End DevOps Deployment: Automated build and deployment pipelines with Jenkins for on-premise Kubernetes infrastructure; configured Prometheus/Grafana monitoring, service networking, and SSL/TLS.

Member, Control Software | Wipro PARI Pvt. Ltd.

Aug 2022 – Sep 2023

- Deployed and maintained .NET applications on Windows Server environments using IIS, including application pool configuration, bindings, certificates, runtime dependencies, and deployment troubleshooting.

- Automated and streamlined application deployment and configuration processes for Windows-based industrial applications, reducing manual deployment effort and improving release consistency.
- Monitored application and Windows Server health, investigated logs and service failures, and resolved deployment, connectivity, and runtime issues.
- Worked with Azure cloud resources, on-premise Windows infrastructure, networking, backup, and data synchronization in a hybrid environment.

PROJECTS

Smartphone Price Prediction System

- Built a Linear Regression model to predict smartphone prices, applying PCA for dimensionality reduction and feature optimization.
- Achieved 83% R^2 score after preprocessing (Pandas, NumPy) and hyperparameter tuning; deployed the model on AWS for hosting and testing.

CERTIFICATIONS

- DevOps and Cloud Computing — Physics Wallah (PW), Jan 2026
- Docker Mastery: with Kubernetes + Swarm — Udemy, Jan 2026

EDUCATION

- Postgraduate Diploma in Data Science and Analytics — Imarticus Learning Institute, Pune (2024)
- M.Sc. Electronic Science (First Class) — Modern College of Arts, Commerce & Science, Pune (2024)
- B.Sc. Electronic Science (First Class with Distinction) — Modern College of Arts, Commerce & Science, Pune (2022)
